“ in High School Jesse and I did a lot together but the things that stand out the most are our summer jobs. We use to work in the watermelon fields and turnip green fields, in the watermelon fields one of the first things Jesse would do is pick a huge watermelon 🍉 put a hole in it and we would fill with Boones farm strawberry 🍓 hill wine and at the end of the day we all would cut a slice. As far as the turnip green farm Jesse and I would race the flatbed trucks up and down the rows. What made this interesting is the trucks had no brakes.

*But no matter what after a hard day of work we would go home and shower put on colohhn hop in his GTO and head downtown Wildwood and set at the auto parts store watching traffic and flirt with all the girls.*
